

CHARLYN PHIL ROSE T. CAOILE

Butuan City, Philippines | charlynprcaoile@gmail.com

PROFESSIONAL SUMMARY

Software Developer with 5+ years of experience delivering robust web, mobile, and enterprise applications. Specialized in building scalable web architectures using JavaScript, Node.js, and Python, alongside cross-platform Flutter development. Currently expanding expertise in React and Tailwind CSS for modern frontend development. Proven track record in responsive web technologies, offline-first architecture, geospatial data integrations, and automated CI/CD pipelines. Open to freelance, remote, and contract opportunities.

TECHNICAL SKILLS

- **Languages/Frameworks:** React, Tailwind CSS, Flutter, Dart, Python, FastAPI, Flask, JavaScript, HTML5, CSS3, VB.NET, Node.js
 - **Databases & Cloud:** ObjectBox (Local NoSQL), MySQL, SQLite, Firebase, Relational Databases
 - **Mapping & DevOps:** OpenStreetMap (OSM) SDK, Geolocation, Git/GitHub, Postman, CI/CD Pipelines
 - **Design Tools:** Photoshop, Canva
 - **IT Infrastructure:** Systems Administration, Network Configuration, Hardware/Software Troubleshooting
-

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer | Self-Employed | 2026 — Present

- Building modern, responsive web interfaces for clients using React and Tailwind CSS.
- Developing clean, conversion-focused landing pages with HTML, CSS, and JavaScript.
- Creating graphic design assets, social media graphics, and UI mockups using Photoshop and Canva.
- Focused on clean UI, fast load times, responsive design, and intuitive user experiences.

Caraga State University | Computer Programmer | January 2024 – September 2025

- Developed the MapX.ph landing page and Flutter mobile app, a GIS platform for property mapping, assessment, and taxation.
- Built an interactive web interface for parcel visualization, automated valuation, and real-time updates.
- Designed a mobile app for property owners to manage assets, pay taxes, and receive notifications.

- Engineered offline-first functionality using ObjectBox for local data caching and sync loops with a MapX server.
- Integrated OpenStreetMap (OSM) SDKs for interactive map interfaces and real-time geospatial tracking modules.
- Built lightweight REST endpoints using Python, FastAPI, and Flask.
- Configured automated CI/CD pipelines and managed Git team workflows.

Aptex Textile Printing Corporation | Software Developer | July 2020 – January 2024

- Maintained and upgraded core internal business systems using VB.NET.
- Designed and optimized financial reporting layouts using Crystal Reports.
- Managed MySQL database schemas, optimizing queries and executing routine data backups.
- Resolved software bugs, database bottlenecks, and infrastructure issues to minimize downtime.
- Provided IT technical support and authored user documentation.

iCan Realty | Admin Staff | August 2019 – June 2020

- Generated operational reports and managed administrative workflows.
- Assisted with internal software deployments and desktop system administration.

Komspec Technologies | IT Support & Network Trainee (OJT) | January 2019 – June 2019

- Assisted in network infrastructure layouts and hardware deployments at SJIT.
- Configured and maintained desktop workstations, LAN connections, and peripheral hardware.

EDUCATION & KEY PROJECTS

Bachelor of Science in Information Technology | ACLC College of Butuan | 2015 – 2019

Capstone Project: Agusan River Flood Monitoring System Using Raspberry Pi with SMS Advisory

- Engineered a working IoT prototype using Python and Flask on a Raspberry Pi to process live telemetry from water-level sensors.
- Developed automated SMS advisory broadcasts via a GSM module during critical thresholds.
- Awarded 2nd Best Paper and published in the RIED Multi-Disciplinary Research Journal (RMRJ).
