

CHARLYN PHIL ROSE T. CAOILE

Butuan City, Philippines | +639912340180 | charlynprcaoile@gmail.com

PROFESSIONAL SUMMARY

Software Developer with 5+ years of experience delivering robust web, mobile, and enterprise applications. Specialized in building scalable web architectures using **JavaScript, Node.js, and Python**, alongside cross-platform **Flutter development**. Proven track record in responsive web technologies, offline-first architecture, geospatial data integrations, and automated CI/CD pipelines. Strong background in database optimization and systems maintenance, bridging complex backend logic with smooth frontend user experiences.

TECHNICAL SKILLS

- **Languages/Frameworks:** Flutter, Dart, Python, FastAPI, Flask, JavaScript, HTML5, CSS3, VB.NET, Node.js
- **Databases & Cloud:** ObjectBox (Local NoSQL), MySQL, SQLite, Firebase, Relational Databases
- **Mapping & DevOps:** OpenStreetMap (OSM) SDK, Geolocation, Git/GitHub, Postman, CI/CD Pipelines
- **IT Infrastructure:** Systems Administration, Network Configuration, Hardware/Software Troubleshooting

PROFESSIONAL EXPERIENCE

Caraga State University | Computer Programmer | January 2024 – September 2025

- Developed cross-platform mobile and web applications using Flutter, Dart, and responsive web technologies.
- Engineered offline-first functionality using ObjectBox for local data caching and sync loops with a MapX server.
- Integrated OpenStreetMap (OSM) SDKs for interactive map interfaces and real-time geospatial tracking modules.
- Built lightweight, clean backend services and REST endpoints using Python, FastAPI, and Flask.
- Validated API endpoint parsing and managed staging environments using Postman.
- Configured automated CI/CD pipelines for code linting, unit testing, and production deployment workflows.
- Managed feature branches, code reviews, and merge conflict resolutions within a Git team workflow.

Aptex Textile Printing Corporation | Software Developer | July 2020 – January 2024

- Maintained and upgraded core internal business systems and enterprise applications using VB.NET.
- Designed and optimized operational and financial reporting layouts using Crystal Reports.
- Managed MySQL database schemas, optimizing queries and executing routine data backups.
- Resolved software bugs, database bottlenecks, and infrastructure issues to minimize operational downtime.
- Provided IT technical support, diagnosed hardware/software errors, and authored user documentation.

iCan Realty | Admin Staff | August 2019 – June 2020

- Generated operational reports, managed administrative workflows, and maintained digital records.
- Assisted with internal software deployments, database entry updates, and desktop system administration.

Komspec Technologies | IT Support & Network Trainee (OJT) | January 2019 – June 2019

- Assisted in executing network infrastructure layouts and hardware deployments on-site at SJIT.
- Configured and maintained desktop workstations, LAN connections, and peripheral hardware.

EDUCATION & KEY PROJECTS

Bachelor of Science in Information Technology | ACLC College of Butuan | 2015 – 2019

Capstone Project: *Agusan River Flood Monitoring System Using Raspberry Pi with SMS Advisory*

- **Hardware-to-Software Architecture:** Engineered a working IoT prototype using Python and Flask deployed on a Raspberry Pi microcontroller to ingest and process live telemetry from water-level sensors.
- **Automated Communication Pipeline:** Developed the backend routing logic to instantly parse data streams and trigger automated SMS advisory broadcasts via a GSM module during critical thresholds
- **Recognition:** Awarded 2nd Best Paper and published in the RIED Multi-Disciplinary Research Journal (RMRJ).

Relevant Coursework: Software & Application Development, Network & System Administration, Database Management, UI/UX and Graphic Design.
